Technical Skills

Security Platforms (Professional Experience)

- SentinelOne
- LogRhythm
- Trend Micro Cloud One
- Trend Micro Apex One
- Trend Micro Vision One
- Tanium
- AWS
- Google Chronicle
- CyberArk
- Imperva

Security Tools (Academic Labs)

- Wireshark
- Nmap
- Metasploit
- Nessus
- OpenVAS
- Packet Tracer
- Aircrack

Programming & Scripting

- C-Sharp
- Python
- JavaScript
- SQL
- HTML
- CSS

Operating Systems

- Windows
- Windows Server
- Kali Linux
- Ubuntu Linux

Professional Experience

Security Analyst / SOC Analyst

Accenture Mauritius

January 2023 – January 2026

Key responsibilities:

- Conducted vulnerability assessments and security risk analyses for client environments.
- Monitored and investigated security alerts using LogRhythm & Google Chronicle.
- Investigated and responded to security incidents using SentinelOne, Trend Micro, and Tanium.
- Configured and administered security solutions, including WAF, patch management, and vulnerability assessment tools.
- Produced security reports and recommended remediation actions for identified risks.
- Delivered cybersecurity training and provided on-call incident response support.

Software Developer Trainee

Rogers Capital Technology

January 2022 – December 2022

Key responsibilities:

- Normalized SQL databases to improve data integrity and efficiency.
- Enhanced and maintained the Avanteam ticketing system.
- Delivered training sessions to staff on internal applications.
- Designed business process workflows and documentation.
- Developed responsive web pages using HTML, CSS, and JavaScript.

Web Developer Trainee

Linkeo

October 2021 – December 2021

Key responsibilities:

- Developed 15+ responsive websites for clients.
- Built web pages using HTML, CSS, and JavaScript.
- Collaborated with team members to deliver projects within deadlines.

IT Officer - Internship

Rajiv Gandhi Science Center

August 2020 – December 2020

Key responsibilities:

- Conducted research to support the development of new educational galleries.
- Installed, configured, and maintained computer software.
- Assisted with network cabling and workstation setup.
- Provided technical support to staff and users.

Degree Project: Information systems & Technology project

LinkByNet

January 2021 – June 2021

Developed an API for LinkByNet company – University Project
Skill Acquired: Teamwork, HTML, SQL, PHP

Education Background

- Middlesex University – 2023 to 2026
MSc Cyber Security and Pen Testing
Completed in 2026
- Curtin Mauritius University – 2018 to 2021
Degree – Business Information Technology & System
Completed in 2021
- Modern College
Higher School Certificate
Completed in 2017
- MGSS Flacq College
School Certificate
Completed in 2015

Certifications

Microsoft

- Azure Fundamentals (AZ-900)
- Security, Compliance & Identity Fundamentals (SC-900)

Google Chronicle

- Chronicle Certified SOAR Developer
- Chronicle Certified SOAR Analyst
- Chronicle SOAR SIEM Fundamentals
- Chronicle SIEM Fundamentals

Cisco Networking Academy

- Endpoint Security
- Cyber Threat Management

Trend Micro

- Vision One Fundamentals
- Threat Expertise

Fortinet

- NSE 1 Network Security Associate

Published Paper

Nextcomp Conference 2024

Paper Title: Effective Detection of Fileless Malware: A Review and Comparative Analysis of Detection Techniques

Description: Conducted a comparative analysis of techniques used to detect fileless malware and evaluated their effectiveness in identifying stealthy malware activity.

Published at **IEEE Xplore**

Awards

- **Best Student Award** – MSc Cyber Security & Penetration Testing – Awarded for outstanding academic performance.
- **Middlesex Digital Technologies Showcase** – Selected to present dissertation project at the Digital Technologies Showcase.

Web Development Projects

Web Designer & Developer

2021 – 2025

- Designed and developed 6+ responsive websites for personal, family, and client projects.
- Developed front-end interfaces using HTML, CSS, and JavaScript.

GitHub Projects

AI-Enhanced Honeypot for Cyber Threat Detection (Dissertation Project)

- Developed a honeypot network using Python, Mininet, and FastAPI.
- Implemented and evaluated Decision Tree, Random Forest, and Neural Network (MLP) models for attack detection.
- Processed and analysed the UNSW-NB15 intrusion detection dataset using machine learning techniques.
- Simulated attacks including Brute Force, Denial-of-Service (DoS), and Insider Misuse.
- Built a real-time monitoring dashboard for attack logging and threat visualisation.
- Evaluated model performance using Accuracy, Macro F1-score, ROC-AUC, PR-AUC, and K-Fold Cross-Validation.
- Achieved over 90% detection accuracy, with Random Forest providing the strongest overall performance.

Endpoint Sentinel – Endpoint Monitoring System (Master's Project)

- Developed a Python-based endpoint monitoring and administration platform with real-time monitoring of CPU, RAM, and disk utilization.
- Implemented configurable threshold-based alerts with automated email notifications when system resources exceed defined limits.
- Developed a network scanning module supporting host discovery, port scanning, and service/version detection, with scheduled scan capabilities.
- Integrated a CVE tracking module that retrieves newly published vulnerabilities and notifies system administrators of potential security threats.
- Implemented additional administrative features including desktop messaging, software update tracking, email management, secure authentication, and task scheduling.

Personal Cybersecurity Portfolio Website

- Designed and developed a responsive personal portfolio website using HTML, CSS, and JavaScript.
- Implemented interactive components including a navigation system, project showcase, timeline, contact form, and back-to-top functionality.
- Structured the website to showcase my cybersecurity experience, technical skills, academic projects, and professional achievements.
